

Great Northern Homes Meet Sean DuPerron & Interior Designer Christina DuPerron

Understated elegance is the best way to describe Sean's craftsman style remodel on Platte lake. The lake cottage utilizes the new wave color palette "greige" and the attention to detail is breathtaking. Custom newel posts, banisters and fireplace mantle were created and crafted in Sean's own woodworking facility.

Sean's wife, Christina, has assisted the homeowner in selecting textures, finishes and products that blend together seamlessly! Although the home is a reflection of their clients taste, Christina's design expertise, inspiration and professional insight are evident throughout. The charming bungalow will linger in your thoughts creating pleasant flash-backs of subtle design details, unique custom features and of course amazing water views!

Sean's building expertise and astute attention to detail and Christina's design experience and industry connections create one-of-a-kind results for their homeowners, often saving them time, money and regrets!
